SUMMARY

Computer science student entering third year, focused on practical development and system design.
I mainly work with Flutter for UI and PHP/MySQL for backend and data management.
Currently building a management system for Qur'anic schools to support organized learning and administration.
Always looking to improve I approach every project as a chance to learn and build better.

Current Work

Qur'anic School Management System (In Progress)
A desktop and web-based system designed to help Qur'anic schools manage their full ecosystem, including students, guardians, teachers, and supervisors. Inspired by the values of the Ahl Al-Quran project, the system promotes organized, transparent, and Qur'an-focused educational management.
